- **Available without a prescription**
- **Assist conception in the privacy of home**
- **Cost-effective:** a cost alternative to more invasive, costly, in-clinic treatments
- **Easy to use:** 3 simple steps

Testimonials

"My wife and I got married while I was in the Army and between my deployments and careers we ended up waiting until our we were almost 40 to try to start a family. We both had a lot of concerns about our ability to conceive but fortunately the Stork was available. We were able to use it in the privacy of our own home and after only two tries, we conceived. We're 6 months along now and we couldn't be happier!"

– A.K.Z., US

"Thank you!!! After over a year of trying to conceive and finding out husband had a few sperm related issues, we got pregnant on our second month using the stork!... we are thrilled and thankful that The Stork is available and I will recommend it to others."

– Sarah L.

"My husband and I have been trying to conceive for nearly two years. He has a low sperm count which has contributed to the problem. This month we used The Stork along with Premama Fertility Drink and FertiliTea and at 11 DPO we have tested positive... I recommend The Stork. I don't think I'd have that HPT Positive without it."

– Johnnae W., US

"The Stork OTC is an innovative tool that will certainly be of interest to patients...The Stork OTC has the advantage of being able to be used at home. Thus, patients do not have to have the inconvenience of being seen in the doctor's office."

– Dr. James M. Goldfarb, MD MBA

The Stork® OTC

The Stork OTC is a uniquely designed medical device you use at home, during ovulation, to assist your chances of becoming pregnant. Our FDA–cleared, over-the-counter device combines an innovative applicator and an established conception technique – cervical cap insemination. This smart technique enables the sperm to quickly bypass the vaginal tract and places the sperm as close as possible to the opening of the cervix, right where it needs needs to swim up through to get to the egg.

The Stork OTC is designed to be used as a "next step" for you and your partner when trying to conceive, before advancing into more costly in-clinic reproductive treatments.

How Does The Stork® OTC Work?

Its simple design includes two main parts – the Conceptacle® and the applicator. The Conceptacle consists of a latex-free, condom-like sheath with a cervical cap resting within the sheath. The Conceptacle is used to collect the semen containing sperm, worn during intercourse, or alternatively the device can be used with donor sperm. The cervical cap is then removed and placed into the applicator. The applicator cradles the cervical cap and guides it through the vagina to the cervix. This delivers the sperm next to the cervix. The cervical cap is then removed after 4-6 hours using a tampon-like pull (string), optimizing your chances of conceiving.

About Cervical Cap Insemination

- Pregnancy success rate of up to 20%[3].
- Prevention of backflow of semen into the vagina[4].
- Prolonged exposure of the spermatozoa (Sperm cell) to the cervical mucus[4].
- Enables sperm to bypass the vaginal environment quickly, reducing the risk of sperm loss in the vaginal tract[4].
- Considered a less invasive method of aiding in conception with a limited number of risks[5].

Up to 20% of women who use cervical cap insemination, the technique of the Stork OTC, get pregnant. Comparable to IUI with recorded success rates between 16-21%.*

A recently published clinical study demonstrated that in 85% of subjects, The Stork OTC **delivered 3.23 times** the sperm score value within cervical mucus compared to natural intercourse and … **presents a greater concentration of sperm to targeted cervical mucus than natural intercourse.**

Frequently Asked Questions

When do I use The Stork OTC?

Suggested use of The Stork OTC is during ovulation (the most fertile days of the woman's cycle). The Stork OTC can be used alongside an ovulation test kit, (used to help determine your most fertile days).

Do I need a prescription for The Stork OTC?

No. The Stork OTC is available without a prescription. If you have a prescription, you can still order The Stork OTC from our website.
